

— YOUR SOCIAL HOUSING PARTNER —

WINDOW STYLES

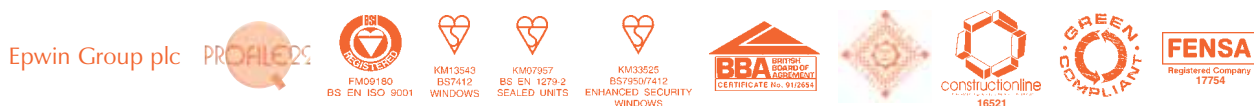

A guide to our standard casement window styles

Since 1985 Wrekin Windows has only supplied PVC-U windows and doors to the social housing sector. In that time our factory has manufactured over half a million products, for local authority and housing association properties across the UK. Our products hold every relevant quality standard available and is why we have a unique understanding of what specifiers, contractors and tenants actually want.

As a specialist in social housing we embrace the recommendations of Sir Michael Latham and Sir John Egan and we apply Best Value and Partnering techniques to every contract. That guarantees you an integrated and co-ordinated team within our business as well as with our partners.

Notes:

- ① Our **Best Value** range is easier to fabricate and therefore more cost-effective than windows in our Non-Preferred range.
- ② All products are shown from outside. Left and right hand versions of the same style are given a different reference number.
- ③ Style reference numbers remain the same regardless of transom or mullion positioning. They are illustrated here in regular proportions for identification purposes only. Note: Style 20 is illustrated in three popular variants.
- ④ The need to provide clear egress openings in compliance with Building Regulations 1991 Fire Safety, approved Document B, section B1, will often determine styling and mullion/transom positioning. Our Technical Department will be happy to provide design assistance if required on **01952 205000**.
- ⑤ Storey height windows should have safety/security glazing specified to the low level areas or alternatively select from range of solid infill panels.
- ⑥ Style/price comparisons may fluctuate if safety glazing is specified but is only necessary on the lowest level panes.
- ⑦ Other special styles are available subject to manufacturing and technical limitations.

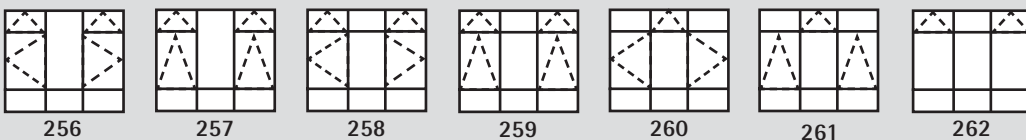

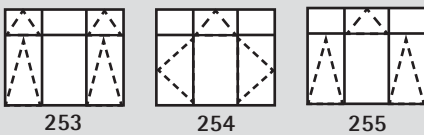

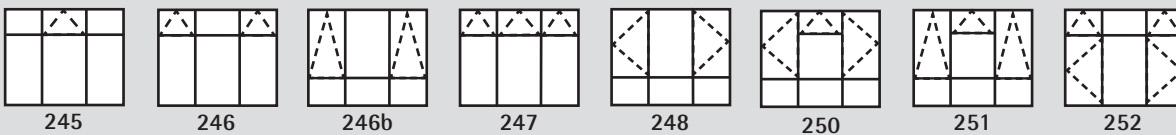

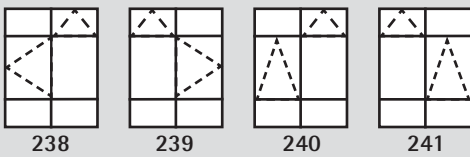

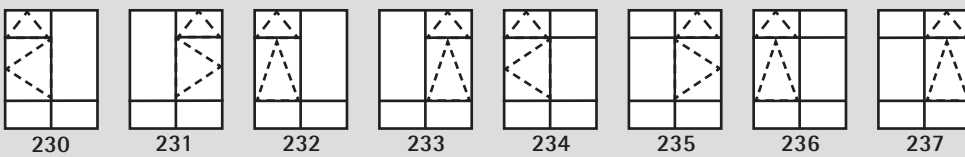

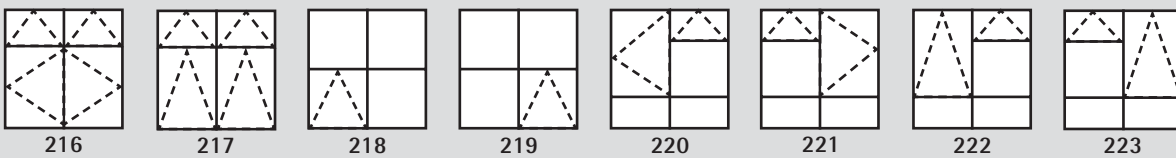

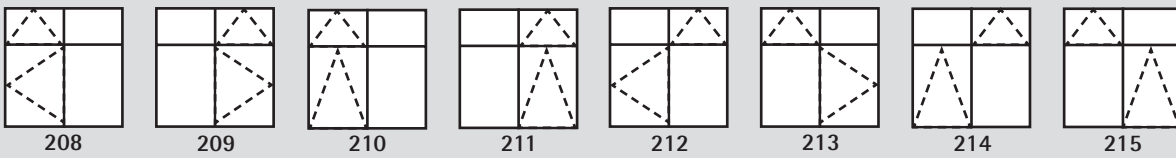

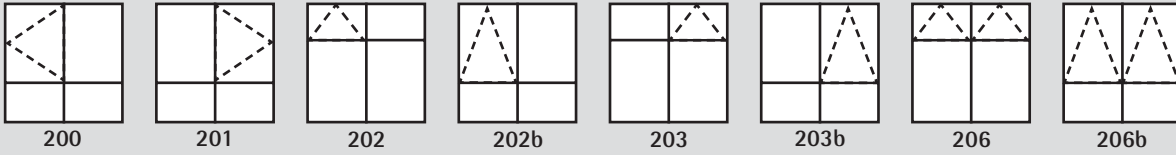

Please contact us on **01952 205000** if you have any queries about our range and specification or for more details.

Casement Window Styles Range
